Through the association, we also offer skill loans with assistance of banking partners to make training affordable and easily accessible for aspiring drone pilots.

Recently, our company has started our drone services for “Prime Minister Svamitva Yojna” in a MOU-led understanding with GIS companies viz. MatrixGeo, NeoGeo and GeoKno. This programme is Government of India’s initiative towards establishment of clear ownership of property in rural inhabited (Abadi) areas, by mapping of land parcels using drone technology and providing ‘Record of Rights’ to village household owners with issuance of legal ownership cards (Digital Property cards/Title deeds) to the property owners.

SUMMARY OF OUR INDUSTRY

The Indian drone industry has witnessed a rapid growth in recent years, driven by the increasing demand for drones across a range of sectors, including agriculture, infrastructure, public safety, and defence.

The GoI is actively promoting the growth of this industry by introducing policies and initiatives to encourage innovation and entrepreneurship in this field. The Civil Aviation Ministry estimates that the Indian drone market shall reach an estimated turnover of INR 120 to 150 billion by 2026.

The government would play a critical role in creation of a viable market for drones, so that the country can realize its own manufacturing potential. The government’s fillip through its role as market maker has a potential to expand demand to approximately INR 75,000 Cr in the Commercial sector, and INR 23,000 Cr in the Homeland Security sector. As much as **60% of the commercial manufacturing potential will arise from Government dominated sectors**.

SECTION III – RISK FACTORS

*An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties summarized below, before making an investment in our Equity Shares. The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on page numbers 114 and 227, respectively, of this Red Herring Prospectus as well as the other financial and statistical information contained in this Red Herring Prospectus. Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “**Financial Information, as Restated**” beginning on page number 193 of this Red Herring Prospectus.*

If any one or more of the following risks as well as other risks and uncertainties discussed in the Red Herring Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects, and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.

*This Red Herring Prospectus also contains **forward looking statements** that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Red Herring Prospectus. These risks are not the only ones that our Company face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein.*

Materiality

The Risk factors have been determined based on their materiality, which has been decided based on following factors:

1. Some events may not be material individually but may be material when considered collectively.
2. Some events may have an impact which is qualitative though not quantitative.
3. Some events may not be material at present but may have a material impact in the future.

Internal Risk Factors

1. ***Our training business, (training through drones) is highly regulated and subject to change, we have DGCA license subject to certain conditions. If we fail to comply with the applicable regulations, rules prescribed by Government of India as well as condition on which DGCA license has issued, our business, financial condition may have a material adverse effect on our business & operations.***

Operations in our industry are highly regulated and are subject to stringent laws and regulations. For imparting drone training the current regime requires for application for DGCA authorized Remote Pilot Training Organizations (RPTOs). The validity of such license is 10 years from the date of issuance i.e., January 31, 2022 and further the validity of the license depends on the conditions laid down while issuing such license. Moreover, the renewal process of license is rigorous and time consuming and there is no guarantee that we can secure the license again well in time. We also cannot assure you that DGCA in the future would not amend the existing requirements having higher quality standards which may delay the renewal/application process. If we are unable to meet existing/future requirements, our business, financial condition as well as ability to generate desired cash flow would be affected materially.

- 2. Presently the drone industry is in a nascent stage. If the industry does not experience significant growth, then we will not be able to achieve our anticipated level of growth.**

The drone industry is currently considered in a nascent stage, because it is a relatively new and emerging industry that has not yet achieved widespread adoption across all sectors of the economy. The adoption of drones for commercial and consumer purposes is still in the early stages, and there are many challenges that need to be addressed before they can become mainstream. The main reasons are, it is at a very early stage of development, the cost of drones is very high to afford and there still exists regulatory and legal issues.

However, the industry has the potential to experience significant growth in the coming years. It has a wide range of application across various industries, including agriculture, construction, surveying, photography, and delivery services, among others. However, if the industry does not experience significant growth, it could limit the potential for businesses to achieve their anticipated level of growth.

Furthermore, the growth of the drone industry is closely tied to the development of regulations and policies that govern drone operations. Without significant growth, it may be more challenging for favorable regulations that promote the safe and responsible use of drones, which could limit the industry's potential.

- 3. We are highly dependent on our group company and other drone manufacturing companies for meeting our drone demands. We may not be able to acquire desired drones if the group company delays in manufacturing and delivery of the drones or unable to manufacture drones whether because of scarcity or unavailability of raw material or otherwise.**

Currently to meet our drone demand, we are dependent on our group company i.e., Hubblefly Technologies Private Limited. Our group company may import certain components for manufacturing drones and we may not be able get our delivery timely, if the raw material for manufacturing drones become scarce or unavailable or any hindrance arises which affect global supply chain. If any such situation arises in future, this would materially affect our ongoing operations and business and may not be able to achieve our goals as planned.

Further, we have not ensured any alternative source for procuring drones as of now. Though we are continuously evaluating the potential domestic vendors for the supply of components in order to reduce our dependency, we cannot assure you that we would be able to meet our requirements only from domestic vendors and not be dependent on global vendors. Further, DGFT has recently modified the Indian Trade Classification (Harmonised System) 2022 Schedule-1 (Import Policy) and banned the import of UAVs to provide a momentum to the indigenous manufacturing of UAVs. However, we cannot assure you that GoI would continue to introduce such policies to boost the indigenous manufacturing of UAVs in India.

We are still evaluating the drone manufacturing companies that could supply us with drones as per our specifications in a timely manner. Any delay in discovering appropriate suppliers could adversely affect our business.

- 4. Any unauthorized access or intrusion into our software or systems, as well as any form of cyber-attack, could significantly harm our business and have a negative impact on our financial condition and operating results.**

Our business may be at risk of cyber-attacks, data theft, malicious intrusion, and viruses targeting our website, internal software systems, third-party cloud services, and UAVs. These products are deployed in high-security surveillance activities involving sensitive and confidential data, and any hacking of our UAVs could lead to the leakage of such data, adversely impacting the internal and external security of our customers' jurisdictions. However, our UAVs can be hacked by intercepting signals between UAVs and the persons controlling it. The critical targets in our system vulnerable to cyber-attacks or security breach are our UAV, GCS software, and integrating applications. While we have taken measures to prevent cyber threats, including encryption of data feed, security mechanisms, and control measures, we cannot guarantee that our systems will be invulnerable to cyber-attacks in the future. Such attacks may cause equipment failures or disrupt our operations and result in significant expenses or loss of market share. A failure to protect sensitive information may lead to reputational damage, and any future incident could adversely affect our operations, services, intellectual property, financial

condition, and competitive advantages. Although we aim to minimize cyber threats, we cannot assure that we will not encounter them.

5. ***Our Company has not complied with certain statutory provisions of the Stamp Act, 1899. Such non-compliances / lapses may attract penalties and prosecution against the Company and its directors which could impact the financial position of the Company to that extent.***

Our Company has not paid stamp duty with certain statutory provisions of the Stamp Act, 1899 as are listed hereinafter:

Payment of consolidated stamp duty of Rs. 21,250/- (Twenty-One thousand Two hundred Fifty only) pursuant to issue of Physical Equity Shares of the company issued since incorporation till the dematerialization of shares is pending by the Company.

Due to such non-compliance, minimum penalty of 1 time the stamp duty may be levied (maximum upto 10 times) as may be imposed by the SDM. Such non-compliance can have a direct impact on the financial performance of the company.

However, we have initiated the process of payment of proper stamping fees on physical shares issued since incorporation (01- 4250000), which will be completed in due course as and when we receive notice from the concerned authorities, i.e., Stockholding Corporation of India (SHCIL).

6. ***Our drones are not operational during the monsoon season, due to the increased risk of damage to our equipment and potential safety hazards. As a result, extended monsoons can directly impact our revenue from operations.***

Drones, like most electronic devices, are vulnerable to damage from water and moisture. Excessive moisture can interfere with their proper functioning. Therefore, it is common for drone companies to limit their operations during rainy seasons to avoid costly repairs or replacements.

Operating drones in rainy conditions can be risky as water can damage the motors, batteries, and electronics of the drone, which can cause accidents or malfunctions. Additionally, flying drones in the rain can be difficult as precipitation can interfere with the drone's sensors, causing it to lose its position or orientation.

To avoid these risks, many drone companies choose to operate only during dry seasons when the weather is more predictable and the risk of damage to their equipment is lower. This may mean that the company could use drones to generate revenue only for 9 to 10 months out of the year, depending on the local climate and weather patterns.

While this limitation may have a direct impact on revenue, it is a necessary trade-off to ensure the longevity of the drones and the safety of the operators and those around them.

7. ***There are outstanding legal proceedings involving our Company as well as promoter and Directors. Any adverse outcome on such proceedings may affect our business, financial condition and reputation.***

13. Our Company does not own the premises through which we conduct our business operations.

The premises on which our Registered Office is situated is owned by Ms. Shashi Bala and Mr. Alok Sharma jointly and the same has been occupied and used by us on a leave and license basis vide Leave and License Agreement dated May 01, 2023 executed between our Company and Ms. Shashi Bala and Mr. Alok Sharma. In addition to our Registered Office, we also operate from Village Bahora Kalan, Gurugram which is also on leasehold basis. We cannot assure you that we will be able to continue the above arrangements on commercially acceptable or favourable terms in future. In the event we are required to vacate the current premises, we would be required to make alternative arrangements for new premises and other infrastructure and facilities. We cannot assure that the new arrangements will be on terms that are commercially favourable to us. If we are required to relocate our business operations during this period, we may suffer a decline in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial

condition. For details regarding such leasehold properties, please refer to chapter titled “Our Business” on page. 113 of this Red Herring Prospectus.

14. We have entered into various agreements/memorandum of understanding with various entities for imparting drone training, our business and financial positions including cash flow would adversely affect our business, in case we are unable to renew or cancellation of existing agreements/memorandum of understanding.

We are a DGCA authorized Remote Pilot Training Organisation (RPTO), offering drone pilot training courses. We provide trainings at our training centres at Manesar, Gurugram. In addition to this, we have entered into partnership agreement(s)/MOU(s) with Indira Gandhi Rashtriya Uran Academy (IGRUA) and Sanskardham Academy for providing DGCA authorized drone pilot trainings with a motive of mutual benefit and optimum utilization of collective resources. Forming agreements with various organizations can be beneficial in terms of expanding access to a larger number of locations throughout India.

In case, we are unable to renew or cancel the existing agreement(s)/MOU(s) or enter into new agreement for expansion of training services, we may be adversely affected in terms of our business and financials benefits. For detail of these agreements, kindly refer page 114 of the chapter “Our Business”.

15. To increase our reach across India, we have entered into agreement with various organisations for imparting training. If we are unable to secure further agreements/memorandum of understandings, then we may not able to achieve our desired growth.

We are trying constantly to expand our drone training operation throughout India, for which we are looking to associate with various organizations to provide drone training to students or corporate training in a seamless manner. Further, we are open to enter into various collaboration/arrangements/memorandum of understanding to meet operational difficulties. If we are unable to enter into such collaborations/arrangements/memorandum of understanding, we will not be able to secure growth for our business and would adverse impact our future cash generating ability.

16. We have not received any work orders directly for Survey and Mapping, but through our GIS partners.

Currently, a major portion of our revenue from operations is derived from Survey and Mapping. However, we are not able to directly apply to work orders or tenders under the scheme. We have entered into agreement with our GIS partners such as MatrixGeo, NeoGeo and GeoKno from executing the work orders for key government schemes such as SVAMITVA and Large Scale Mapping (LSM). In case, our GIS partners are not able to or eligible to apply for such tenders or work orders, our revenue of operations may be directly impacted.

17. Our revenue share inter alia comes from imparting training and from survey and mapping. If we are unable to attract new students for our Remote Pilot Training Organization or take up new tender/work orders from government, then the financial growth and cash flows will be adversely affected.

A substantial part of our revenue comes from imparting DGCA approved remote pilot training and for training we have also collaborated with Indira Gandhi Rashtriya Uran Akademi and Sanskar Dham Campus. In the previous financial years, a major portion of our revenue from operation is from our drone pilot training segment given as below:

(Amount in Thousands)

Particulars	March 31, 2023	% of total Revenue	March 31, 2022	% of total Revenue	March 31, 2021	% of total Revenue
Training	62135.21	51.47%	24551.24	95.73%	3917.78	100.00%
Survey & Mapping Services	57242.03	47.42%	0.00	0.00%	0.00	Nil

Drone Surveillance Services	694.47	0.58%	0.00	0.00%	0.00	Nil
Drone Consultancy Services	600.00	0.50%	500.00	1.95%	0.00	Nil
Sale of Product	50.70	0.04%	595.00	2.32%	0.00	Nil
Total	1,20,722.21	100.00%	25,646.24	100.00%	3,917.78	100.00%

To increase the revenue as well as cash flows regular we have to ensure consistent growth of both the divisions, i.e. enrollment of students and agreements for imparting training and acquisition of work orders from government. If we unable to add sufficient number of students or enter into agreements for corporate training, our operations and our ability to generate cash flow would be affected materially.

18. We have faced losses in one out of three previous financial years.

Our business has suffered loss (*Total comprehensive income or loss*) in the financial year ending on March 31, 2021 out of three previous financial years as given below:

(Amount in Thousands)

Profitability	For the year ended on March 2023	For the year ended on March 2022	For the year ended on March 2021
Profit Before Tax	33013.26	2775.50	-615.54

However, the company has maintained a profitability in terms of Earnings before Interest, Tax & Depreciation and Profit before tax in next financial years. For more details of financial information, kindly refer to the page no. 192 in the chapter “*Financial Information*”.

19. Our Company has negative cash flows from its operating and investing activities in the current and past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our investing activities in the previous years as well as present year. Further, there were negative cashflows from operating activities in pas year as per the Restated Financial Statements and the same are summarized as under:

(Amount in Thousands)

Net Cash Generated from	For the year ended on March 2023	For the year ended on March 2022	For the year ended on March 2021
Operating Activities	8,303.87	(754.88)	(1,301.79)
Investing Activities	(58,427.55)	(5,585.81)	(2,590.17)

If we, continue to incur negative cashflows, it may have adverse impact in our financial position. For more details, kindly refer to the page no. 193 in the chapter “*Financial Information*”.

20. Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, we may have to incur additional cost to fund the objects of the Issue because of which our business, financial condition and results of operations may be adversely affected.

We intend to use the Net Proceeds for the purposes described in chapter titled “Objects of the Issue” on page 79. All the funding requirements mentioned as a part of the objects of the Issue have not been appraised by any bank or financial institution. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹ 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

21. Our business has benefitted significantly by schemes launched by GoI to boost the drone industry. Any change/variation in such schemes would have an adverse impact on our operations and financial condition.

Government of India (GoI) has by issuing Drone Rules, 2021 and amendment thereof has provided that a remote pilot training certificate is required before operating any unmanned aircraft system (“UAS”) and has also mandated that no person other than authorized *Remote Pilot Training Organization* shall impart training to those who wishes to operate UAS. Apart from this GoI has also launched PLI scheme for drones and drone components in India to provide incentives to drone manufacturing. The aforesaid initiative has benefitted us significantly; however, we cannot assure that GoI will continue to launch and implement such scheme in future to further support our business to grow even further or GoI will not amend the existing policy that will have reduced benefits and any variation in current policy will have an adverse impact on our business, results of operations, financial condition and cash flows.

Our business may be adversely affected by government developments, which includes:

- changes in government policies and regulations that are related to our products and services;
- changes in various economic policies including in relation to shifts in domestic spending and tax policy, and general economic conditions and developments;
- adoption of new laws or regulations relating to government contracting or changes to existing laws or regulations;
- changes in political or public support for security and defence programs;
- uncertainties associated with the war on terror and other geo-political matters;
- decline or reprioritisation of India’s defence budget; and
- delays in the payment of our invoices by government payment offices

22. If the drone industry does not experience significant growth, or if our products lack multiple use applications, then we will not be able to achieve our anticipated level of growth.

The GoI has issued Drone Rules 2021, which regularized the Drone Industry in India. The drone industry is at a nascent stage and therefore the requirements are continuously evolving. We have experience growth in our business in terms of Revenue from Operations as given below:

	For the year ended on March 31, 2023	% of increase/decrease	For the year ended on March 31, 2022	% of increase/decrease	For the year ended on March 31, 2021
Revenue from Operation	120722.41	370.72%	25646.24	554.61	3917.78

However, we cannot assure you that we will experience similar growth in the future. However, we operate in an industry that is constantly evolving and customer preferences are changing rapidly and therefore we cannot accurately predict the extent to which the demand for our products will increase. Therefore, we cannot assure you that expanding our services will enable us to establish new customer bases and cater to new end-use industries.

23. Business operation and stability depends on many factors, we may not be able to effectively implement our business and growth strategy.

The success of our business inter alia depends on our ability to effectively implement our business and growth strategy. In the past, we have generally been successful in the execution of our business plan but there can be no assurance that we will be able to execute our strategy effectively and within the estimated budget in the future. If we are unable to effectively implement the business strategy, this would have as adverse effect on our operations, business, and financial condition.

24. Inability to protect our intellectual property or any claim that we infringe on the intellectual property rights of others could erode our competitive advantage and could have a material adverse effect on us.

As on date of this Red Herring Prospectus, we have six application pending. Our inability to get the trademark registered or renew registration of our trademark and loss of such trademark could have an adverse effect on our business and operation and may harm the ability to brand image and recognition in the industry. For further details, see “Government And Other Approvals” on page no 248.

Further, we have taken utmost care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing intellectual property rights. Any claims of intellectual property infringement from third parties could lead us to pay significant costs in responding to, defending and resolving such claims. Further, the risk of being subject to intellectual property infringement claims will increase as we continue to expand our operations.

25. We are heavily dependent on our promoters, directors and key managerial personnels for our future growth, any loss of or our inability to attract or retain such persons could adversely affect our business.

Our continued success has heavily depended on the services given by promoters and key managerial personnel. Our dependency on key managerial personnel is considerable for executing our day-to-day activities. Failure to retain or recruit suitable/comparable replacement or loss of any of our promoter and key managerial personnel could have as material effect on us. We cannot assure you that we will be able to retain our promoters or key managerial personnel and any loss of service could seriously impair the ability to continue to manage and expand the business efficiently. In addition, we could incur additional expenses and need to devote significant time and resources to recruit and train replacement personnel, which could further disrupt our business and growth.

26. Our promoter and member of promoter group jointly will continue to have majority control over our Company will may allow them to determine the outcome of matters submitted to shareholders for approval.

Upon completion of this Issue, our Promoters will collectively hold 1,48,71,500 Equity Shares constituting 84.98% (pre-issue) and 61.20% (post-issue) of the equity share capital of our Company and also continue to enjoy remuneration or benefits, reimbursements of expenses. As a result, Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval subject to applicable laws and regulations applicable on our Company. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Individual Promoters and Corporate Promoter will exercise their rights as shareholders to the benefit and best interests of our Company.

Further, the premises on which our Registered Office is situated is owned by Ms. Shashi Bala and Mr. Alok Sharma jointly. and the same has been occupied and used by us on a Leave and License basis vide Leave and License Agreement dated May 01, 2023 executed between our Company and the owners

27. Our insurance policy may not be adequate to cover all the losses which a business could incur. Any inability to maintain adequate cover from material adverse incidents may adversely affect our operation and profitability.

We have obtained a number of insurance policies in connection with our operations as given in chapter titled “*Our Business*” on page 114. While we are of the opinion that the insurance coverage which our Company maintains would be reasonably adequate to cover the normal risks associated with the operations of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our Company’s insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

28. *We have entered into related party transaction in past and may continue to do so in future and which may involve potential conflict of interest.*

As of financial year ended March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled “*Restated Standalone Financial Information –Notes to Financial Information- Note 33 - Related Party Transactions*” at page 222 of RHP of Drone Destination Limited. While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. The related party transactions are conducted on arm’s length basis as per the provisions of Companies Act 2013 and other applicable laws. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

29. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the issue proceeds may delay the implementation schedule.*

Our requirements for proposed funds for our expansion plan as described in the section titled “**Objects of the Issue**” is to be funded from the proceeds of this IPO. Other than this offering, we have not identified any alternate source of funding and any delay or failure to mobilize the required funding or any shortfall in the issue proceeds may delay the implementation schedule. Further, we cannot provide any assurance that we would be able to execute our plans/strategy within the given timeframe. For details, kindly refer to the chapter titled “**Object of the Issue**” on page 79.

30. *Our business may be subject to dispute with employees whether relating to employment or any other kind of conflicts may adversely impact on our business.*

We are significantly dependent on our employees for smooth conduct of our operations. We need advanced engineering and technical services skills and who work well with our clients and students. These employees are in demand and are likely to remain a limited resource in the foreseeable future. We try to maintain cordial relations with our employees, and we believe that our employees play a critical role in our success. While there was no instance of significant dispute with employees whether such dispute relates to their employment or not, however we cannot assume that we shall not experience any disagreement, dispute etc. in future.

31. Certain Agreements, deeds or licenses may be in the previous name of the company.

Our certain agreements, deeds or licenses may be in the name of the erstwhile name of the company Drone Destination Private Limited. In case we fail to change the name of the company in the agreements, deeds or licenses, that were entered before conversion into a public company, it may cause adverse effect on the status and viability of those agreements.

32. Fluctuation of Interest rate may adversely affect the Company's business.

For meeting capital requirement in ordinary course of our business for general capital purpose, we may enter into certain borrowing agreements to meet those requirements. In the event interest rates increase, the cost of borrowing will also be increased and which will have the adversely effect on cash flow and profitability.

33. Any variation in the utilization of net proceeds would be subject to certain compliance requirements, including prior shareholders' approval.

We propose to utilize the Net Proceeds towards general corporate purposes in the manner specified in '**Objects of the Offer**' on page 79. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control.

Further pursuant to Sections 13(8) and 27 of the Companies Act, 2013, any variation in the utilization of the Net Proceeds cannot be done without obtaining the shareholders' approval through a special resolution. In the event of any extraordinary circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Considering the aforesaid provision, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer or vary the terms of any contract referred to in this Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond effectively to any change in our business or financial condition which may adversely affect our business and results of operations.

34. Our inability to establish internal control systems could cause operational errors which may adversely affect our business.

It is a very substantial part of our growth strategy to implement and establish internal control systems to enhance our operations and productivity. Our results of operations may fluctuate, in part, as a result of the nature of our sales efforts and the unpredictability of our sales. Internal control systems comprising policies and procedures are designed to ensure sound management of our operations, safekeeping of its assets, optimal utilization of resources, reliability of its financial information and compliance. The systems and procedures are periodically reviewed and routinely tested and cover all functions and business areas. Taking reasonable steps to maintain compliance and disclosure will prevent financial frauds. We believe that we have adequate financial and operating internal controls to sufficiently guarantee non-compliance.

In case of any inadequacy or weakness in financial control, it may have an adverse impact on our business operations.

35. Our Company may experience challenges with respect to labour relations, our overall operating costs and profitability could be adversely affected and our reputation could be harmed.

While our Company always endeavours to maintain good and healthy relations with the employees, any work disruptions or collective labour actions may have an adverse impact on our business and operations. We have a team of 74 employees as on March 31, 2023. The success of our operations depends on the availability of labour and maintaining a good relationship with workforce, and we currently do not have any trade unions. Even though till date we have not witnessed any of such adverse circumstances with respect to employee or labour disputes,

A shortage of skilled or unskilled personnel or work stoppages caused by disagreements with our workforce, strikes and lockouts as a result of disputes could have an adverse effect on our business, results of operations and financial conditions.

36. We are required to maintain certain approvals and licenses required in the ordinary course of business and the failure to obtain or renew them in a timely manner or at all may adversely affect our operations.

Our Company's business is subject to government regulations and we require certain approvals, licenses, registrations and permissions for operating our business, some of which might have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. In addition, we may not be in compliance with certain conditions prescribed by such approvals or licences. Our failure to obtain such licences and approvals and comply with the applicable laws and regulations could lead to imposition of sanctions by the relevant authorities, including penalties. For further details, please refer to chapter titled "Government and Other Approvals" on page 248. Further, renewal applications for approvals, licenses, registrations and permissions for operating our business need to be made within certain timeframes. While we have made fresh applications for few approvals and licenses, we cannot assure you that we will receive these approvals in a timely manner or at all. Further, in future we will be required to apply for the renewal of approvals and permits for our business operations to continue. If we are unable to make applications and renew or obtain necessary permits, licenses and approvals on acceptable terms, in a timely manner or at all, we may be required to face consequences due to which our business operations may be adversely affected.

37. Our marketing and advertising activities may not be successful in increasing the popularity of our Company among domestic and international clients. If our marketing or advertising initiatives are not effective, this may affect the popularity of our Company.

Our Company is undertaking certain marketing and advertising initiatives with the purpose of increasing the visibility of our Company. Further, our revenues are influenced by marketing and advertising of our services through various means. We rely to a large extent on our management's experience in defining our marketing and advertising activities. If senior management leads us to adopt unsuccessful marketing and advertising activities or initiatives, we may fail to attract and engage new clients. If our marketing and advertising activities are unsuccessful, our results of operations could be materially adversely affected. In addition, increased spending by our competitors on advertising and promotion could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business.

38. Our Company has issued Equity Shares during the last twelve months at a price which may be lower than the Offer Price.

We have, in the 12 months preceding the filing of this Red Herring Prospectus, issued Equity Shares at prices that may be lower than the Offer Price. For details of issues, please refer, page 58 of the chapter "Capital Structure". The price at which our Company has issued the Equity Shares in the past is not indicative of the price at which they will be issued or traded.

39. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and declaration of dividend will depend upon financial performance of our Company at the time of declaration. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements (if any) in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past and there can be no assurance that our Company will declare dividends in the future. For further details, please refer to the chapter titled "Dividend Policy" on page 192 of this Red Herring Prospectus.

- 40. *Industry information included in this Red Herring Prospectus has been derived from an industry report from various websites. The reliability on the forecasts of the reports could be incorrect and would significantly impact our operations.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. - 41. *Sale of Equity Shares by our Promoters or other significant shareholder(s) or any future issue of Equity Shares may dilute your shareholding and adversely affect the trading price of the Equity Shares.***

Any future equity issues by us, including in a primary offering, or any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

Issue related risk

- 42. *Market price of our share will be decide by market forces and issue price of equity share may not be indicative of the market price our share price after the issue.***

After listing and trading permission of equity shares, the price of the shares shall be driven by free market forces. The market price of a company's share is determined by the forces of supply and demand in the stock market. These forces are influenced by a variety of factors, including the company's financial performance, industry trends, economic conditions, and investor sentiment.

When a company issues equity shares, it sets an issue price based on various factors such as the company's valuation, the prevailing market conditions, and the demand for its shares. However, the issue price is not necessarily indicative of the market price of the shares after the issue.

Once the shares are listed on the stock exchange, their price is determined by the forces of supply and demand in the market. If there is strong demand for the shares, the price may rise above the issue price, and if there is weak demand, the price may fall below the issue price.

Therefore, while the issue price of equity shares provides a starting point for the company's valuation, it is not necessarily a reliable indicator of the market price of the shares after the issue. Investors should carefully evaluate all relevant factors and information before making investment decisions in the stock market.

- 43. *Equity Shares of our Company have never been publicly traded, and after the Issue, the Equity Shares may be subject to price and volume fluctuations, and an active trading market for the Equity Shares may or may not develop. Further, the Issue Price may not be indicative of the market price of the Equity Shares after the Issue.***

Prior to this Issue of our Company, no public market existed for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation of Equity Shares

does not guarantee that a market for the same will develop, or if developed, the liquidity of such market for the Equity Shares cannot be guaranteed. The Issue Price of the Equity Shares is proposed to be determined through a book building process in compliance with Schedule XIII of the SEBI ICDR and the same may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The Issue Price will be based on numerous factors, as described in the section “*Basis for Issue Price*” beginning on page 87. This price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in.

Our Equity Shares are likely to trade on NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops, that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

44. Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Shares

Under the present Indian tax laws and regulations, unless specifically exempted, capital gains that arise from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of listed equity shares held for more than 12 months, which are sold using any other platform other than on a recognised stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident and the seller is entitled to avail benefits thereunder, subject to certain conditions.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident and the seller is entitled to avail benefits thereunder, subject to certain conditions. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

45. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Investors are not permitted to withdraw their Bids after closure of the Bid/ Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until the Bid/ Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within six Working Days from the Bid/ Issue Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors’ decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors’ ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

46. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately five Working Days from the Bid/ Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within six Working Days of the Bid/ Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

47. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

48. A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.

As a listed Indian company, there are provisions in Indian legal regime that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

External risk factors

49. The prevailing condition of the COVID -19 pandemic may have impact on our business and operations which is uncertain and such impact may be significant and continual nature on our business and operations.

In the past COVID – 19 has forced many countries including India to impose country-wide lockdowns, restrictions on travel and business operations including temporary closure of business. Further COVID – 19 has also been disruptive for procurement of drone because of huge supply shortage for components. In addition, the future threat of COVID – 19 cannot be overlooked and we cannot predict the impact of the pandemic. Our operation

including business and financial position would be materially affected if we have to restrict our business because of COVID – 19 Pandemic.

50. Global growth is expected to decelerate sharply to 1.7 per cent in 2023 resulting in very high inflation that could directly affect the financial conditions of the company.

As per World bank in their World economic prospects - Jan 2023. Global growth is expected to decelerate sharply to 1.7 per cent in 2023—the third weakest pace of growth in nearly three decades, overshadowed only by the global recessions caused by the pandemic and the global financial crisis. This is 1.3 percentage points below previous forecasts, reflecting synchronous policy tightening aimed at containing very high inflation, worsening financial conditions. A rapid and synchronous monetary policy tightening across major advanced economies around the world. It has contributed to a substantial worsening of global financial conditions, with asset prices in broad and synchronous decline. As a result, investment growth has weakened significantly, and housing markets in many countries are also worsening rapidly. As a result of which our industry will be highly affected and our company may face significant challenges. This could lead to a decline in demand for the company's products or services, as well as increased difficulty in accessing financing or managing currency risks.

51. Any adverse change or downgrading in ratings of India may adversely affect our business, results of operations and cash flows.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

52. The requirements of being a listed company may strain our resources.

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated by the virtue of being a listed company. As a listed company, we will incur considerable legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges on which equity shares of our Company will be listed, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily.

53. Regulatory, economic, political scenario or other factors that are beyond our control may have an adverse effect on our business and financial performance.

Our economy and its securities markets are influenced by economic developments, any adverse economic developments or rising of fiscal or trade deficit may also affect investor confidence and cause increased volatility in securities markets and indirectly affect our economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition, and results of operations. Further financial disruption could also have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares

Also, a change in the government or change in deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business and high rates of inflation could increase our costs without proportionately increasing our revenues.

54. Natural calamities like epidemics, pandemic, or fire, war, terrorist attacks, civil riots or other events could materially and adversely affect our business.

Natural disasters (earthquakes, etc.), epidemics, pandemics, war, terrorist attacks and other events, which are beyond our control, may lead to economic instability, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations could also be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property. We cannot assure you that there will not be any such accidents in the future thereby causing an adverse effect. We cannot assure you that there will not be any such accidents in the future thereby causing an adverse effect on our business and operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

Another wave of COVID-19 pandemic similar contagious disease could adversely affect the Indian economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

55. If there is any change in laws or regulations, or their interpretation, such changes may significantly affect our financial statements or affect our conduct of operation.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Act, 2019, prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favor of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the tax rate (on gross basis) for Indian companies. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

The Finance Act, 2020 (“**Finance Act**”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime. For instance, dividend distribution tax (“**DDT**”) will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely be subject to tax deduction at source.

Further, the Government of India has introduced the Finance Bill, 2023, in the Union Budget for Fiscal 2024. The Finance Bill, 2023 proposes various amendments to taxation laws in India. As such, there is no certainty on the impact that the Finance Bill, 2023 may have on our business and operations or on the industry in which we operate. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Key Assumptions for working capital projections made by Company:

Particulars	March 31, 2021	March 31, 2022	March 31, 2023	March 31, 2024
No. of Days for Trade Payables	288	85	62	21
No. of Days for Trade Receivables	52	36	202	94
No. of Days for Inventory	200	49	12	1

Justification for increase in working capital requirement:

In year 2020-21, the total working capital requirement is Rs. 2469.20 thousand which increased to Rs. 9492.33 thousand because of increase in turnover during that period from 3932.85 thousands to 25,715.79 thousands respectively, by which cash & cash equivalent & short term loan & advances has been increased & in current liability, other current liabilities has been increased.

Furthermore, in year 2021-22, the total working capital requirement is Rs. 9492.33 thousand which increased to Rs. 132,880.23 thousand because of increase in turnover during that period from 25,715.79 thousands to 120,773.22 thousands respectively by which cash & cash equivalent & short term loan & advances has been increased & in current liability, other current liabilities has been increased.

Justification for increase in working capital requirement for estimated period:

The working capital requirements are based on estimation of the future requirements in financial year 2023-24. We have estimated future working capital requirements based on the following:

The IPO proceeds will be deployed at the various objects as mentioned in the chapter “Object of the Issue”. Our object includes purchase of new drones and related capital and working capital expenditures. With the deployment of Drones at training centres and survey and mapping services, more employee strength will be required to be deployed as trainers at training centres and pilots for survey and mapping services. This will in turn increase our working capital requirement.

Further, in 2023-24 our Company will enter into new verticals and start agricultural services, and Rent a Drone service. Due to entering into new business verticals, our working capital and capital expenditures will increase for these verticals.

We have estimated the working capital requirement for the projected years financial year 2023-24 at Rs. 3,60,670.00 Thousands which will be met through mix of Internal Sources, IPO Proceeds and Working Capital Loan from Banks. For FY 2023-24, 85,000 Thousands shall be used from Net Proceeds and balance shall be met through internal accruals and working capital loan from bank i.e. Rs. 2,75,670.00 Thousands.

As it could be seen, that we could meet our regular working capital requirements over the years and would similarly be able to meet the same over the coming years. We require to raise funds to meet the incremental working capital requirement that will assist our organic growth on a broader level.

Key Assumptions and Justification for holding levels:

Particulars	Assumptions & Justifications
Trade Payable	Reduced. The trade payables days have been reduced as we settled the debts owed to trade payables more effectively to place bigger orders with our creditors.
Trade Receivable	The trade receivables days have been reduced to 36 in FY 2022 as compared to FY 2021. However, it has been increased to 202 days at FY 2023. It is due to increase in sales due to government svamitva scheme which is majorly carried out in second half of the financial year with receivables of 120-180 days or more. However, it was reduced to 94 days after considering an efficient balance between training income and services income (Including svamitva scheme)
Inventories	Reduced. It should be noted that the Inventory herein defines Stores and Spares that is required by the company in connection with drones and its maintenance. In FY 2021, company had bought spares with drones with an understanding that repairs and maintenance in initial stage of drones life was high. But with time and experience gained by operational management, company moved towards resource efficiency and thus the reduction in days have happened over the years. In FY 2024, the days are standing at 1 considering the more number of drones will require continuous requirement of stores and spares and ready movements.

GLOBAL OUTLOOK

Global growth is expected to decelerate sharply to **1.7 per cent in 2023**—the *third weakest pace of growth in nearly three decades*, overshadowed only by the global recessions caused by the pandemic and the global financial crisis. This is **1.3 percentage points below previous forecasts**, reflecting synchronous policy tightening aimed at containing very high inflation, worsening financial conditions. The United States, the euro area, and China are all undergoing a period of pronounced weakness, and the *resulting spillovers are exacerbating other headwinds faced by emerging market and developing economies (EMDEs)*. In the near term, urgent global efforts are needed to mitigate the risks of global recession and debt distress in EMDEs.

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. *Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it*, including across major advanced economies (*figure 1.1.A*). Although this tightening has been *necessary for price stability*, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. **Asset prices** have been in broad, *synchronous decline*, *investment growth has weakened substantially*, and *housing markets in many countries are worsening rapidly*.

Although **inflation** is likely to *gradually moderate* over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Shockwaves continue to emanate from the *Russian Federation’s invasion of Ukraine*, especially in energy and other commodity markets. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers (*figure 1.1.B*)

A. G7 policy rates

B. EMDE sovereign spread changes in 2022, by credit rating and energy exporter status

Fiscal space has narrowed considerably, and *concerns over debt sustainability in many countries have risen as global financial conditions have made it more difficult to service debt loads* that have accumulated rapidly in recent years, particularly during the pandemic. Most **commodity prices** have eased, to varying degrees, largely due to the slowdown in global growth and concerns about the possibility of a global recession. **Crude oil prices** have steadily declined from their mid- 2022 peak; meanwhile, **natural gas prices** in Europe soared to an all-time high in August but have since fallen back toward pre-invasion levels. **Non-energy prices**, particularly metal prices, have declined alongside weak demand. While **food prices** have eased from earlier peaks, food price inflation remains very high in some EMDEs. Against this backdrop, global growth is forecast to slow to **1.7 percent in 2023** (figure 1.1.C). This pace of **growth** would be the *third weakest in nearly three decades*, overshadowed only by the global recessions caused by the *pandemic in 2020* and the *global financial crisis in 2009*. This forecast is 1.3 percentage points lower than in June, largely reflecting more aggressive monetary policy tightening, deteriorating financial conditions, and declining confidence. **Growth projections** have been downgraded for almost all advanced economies and about two-thirds of EMDEs in 2023, and for about half of all countries in 2024 (figure 1.1.D).

Figure 1.1.C - Global growth

Figure 1.1.D - Share of countries with downgrades in growth forecasts

Global trade is also expected to *slow sharply alongside global growth*, despite support from a continued recovery in services trade. Downgrades to growth projections mean that global activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon, with EMDEs accounting for most of the shortfall from trend (figure 1.1.E).

In advanced economies, conditions have deteriorated sharply, owing to *declining confidence alongside high inflation and rapid monetary policy tightening*. In the **United States**, one of the most aggressive monetary policy tightening cycles in recent history is expected to *slow growth sharply*. The **euro area** is also contending with *severe energy supply disruptions and price hikes* associated with the Russian Federation’s invasion of Ukraine. In all, *growth in advanced economies* is forecast to slow from **2.5 percent in 2022** to **0.5 percent in 2023**.

In EMDEs, growth prospects have worsened materially, with the *forecast for 2023* downgraded **0.8 percentage point** to a subdued **3.4 percent**. The downward revision results in large part from weaker external demand and tighter financing conditions. *Excluding China*, **EMDE growth** is forecast to *decelerate* from **3.8 percent in 2022** to **2.7 percent in 2023** as significantly weaker external demand is compounded by *high inflation, tighter financial conditions, and other domestic headwinds*. Low-income countries (**LICs**) are expected to *grow* **5.1 percent in 2023**, with forecasts downgraded in about 65 percent of countries. As a result of the sharp slowdown in global growth, **per capita income** is *not expected to surpass 2019 levels until at least 2024* in about one-third of EMDEs. **Per capita income growth** is expected to be *slowest where poverty is highest* (figure 1.1.F).

GLOBAL TRADE

Global trade growth decelerated in the second half of 2022, in tandem with deteriorating activity in major economies. Weakening trade mirrored the *slowdown in global industrial production*, as demand shifted toward its pre-pandemic composition and away from goods. Despite this moderation, **goods trade surpassed pre-pandemic levels last year**; meanwhile, **services trade continued to recover**, supported by the *gradual shift in demand toward services*. **Tourism flows rebounded** as *many countries eased travel restrictions but remained well below pre-pandemic levels* and uneven across regions (WTO 2022). Although **global supply chain pressures** are still above pre-pandemic levels, they have eased since mid-2022, as reflected in lower transportation costs and normalization of inventories (*figures 1.2.A and 1.2.B*). **Weakening demand** for goods is expected to *reduce these pressures further in 2023*.

After softening to 4 percent in 2022, **global trade growth** is expected to *decelerate further to 1.6 percent in 2023*, largely reflecting *weakening global demand (figure 1.2.C)*. Trade is envisaged to be particularly subdued in EMDEs with strong trade linkages to major economies where demand is expected to slow sharply. *In all*, the current post-recession rebound in global trade is on course to be among the **weakest on record (figure 1.2.D)**. **Travel and tourism** are expected to *pick up further* but will be *constrained by slower global activity and high input costs*. **Goods trade** is expected to *moderate* owing to *subdued demand and a gradual shift in consumption toward services*.

INDIAN MACROECONOMIC

India's growth continues to be resilient despite some signs of moderation in growth, says the World Bank in its latest **India Development Update**, the World Bank India's biannual flagship publication.

The Update notes that although significant challenges remain in the global environment, India was one of the fastest growing economies in the world. The overall growth remains robust and is estimated to be 6.9 percent for the full year with real GDP growing 7.7 percent year-on-year during the first three quarters of fiscal year 2022/23. There were some signs of moderation in the second half of FY 22/23. Growth was underpinned by strong investment activity bolstered by the government's capex push and buoyant private consumption, particularly among higher income earners. Inflation remained high, averaging around 6.7 percent in FY22/23 but the current-account deficit narrowed in Q3 on the back of strong growth in service exports and easing global commodity prices.

The World Bank has revised its FY23/24 GDP forecast to 6.3 percent from 6.6 percent (December 2022). Growth is expected to be constrained by slower consumption growth and challenging external conditions. Rising borrowing costs and slower income growth will weigh on private consumption growth, and government consumption is projected to grow at a slower pace due to the withdrawal of pandemic-related fiscal support measures.

Although headline inflation is elevated, it is projected to decline to an average of 5.2 percent in FY23/24, amid easing global commodity prices and some moderation in domestic demand. The Reserve Bank of India's has withdrawn accommodative measures to rein in inflation by hiking the policy interest rate. India's financial sector also remains strong, buoyed by improvements in asset quality and robust private-sector credit growth.

The central government is likely to meet its fiscal deficit target of 5.9 percent of GDP in FY23/24 and combined with consolidation in state government deficits, the general government deficit is also projected to decline. As a result, the debt-to-GDP ratio is projected to stabilize. On the external front, the current account deficit is projected to narrow to 2.1 percent of GDP from an estimated 3 percent in FY22/23 on the back of robust service exports and a narrowing merchandise trade deficit.

The labor market has recovered unevenly

On the labor market front, improvements have been uneven. Enrolments to the employment provident fund—a proxy for formal employment—moderated in Q3 FY22/23 (following an increase in Q2), driven by firms in the services sector. The number of new subscribers to the employee provident fund remained below one million through October-December 2022. However, the unemployment rate dipped from the year's peak of 8.1 percent in August 2022 to 7.5 percent in February 2023, driven by a sustained fall in urban unemployment. Unemployment in rural areas fell below 7 percent in January but increased slightly in February. Demand for work under the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) also moderated from December to January and remains around pre-pandemic levels.

Headline inflation averaged 6.3 percent over Oct 2022 – Feb 2023

Headline CPI inflation averaged 6.3 percent in October 2022-February 2023, a percentage lower than that in the first half of FY 22/23 (Figure 1). Inflation settled within the Reserve Bank of India's (RBI) target range (2 – 6 percent) for the first time in 2022 in November and again in December. The moderation in prices was driven by

a decline in food inflation, which accounts for almost 40 percent of the national CPI basket. Food prices softened the most for vegetables and fruits, while prices edged up for cereals, spices and protein-based food items (Figure 2). The upward pressure on cereals and spices contributed to headline inflation once again rising to above the RBI’s tolerance band in January and February 2023. Fuel inflation remained moderate over this period, with kerosene prices registering a decline in response to softening international prices. Over the past year, the government implemented several supply-side measures to control inflation – prohibiting wheat exports, imposing export duty on rice and continuing increased entitlements under the food subsidy program to protect vulnerable sections of the population from rising food inflation.

Figure 1: Headline inflation is elevated but easing as food and fuel prices moderate

Figure 2: : Food inflation has moderated driven by lower inflation in vegetables

The RBI has continued to hike interest rates in response to inflationary pressure

As inflation remained around the upper threshold of the RBI’s inflation target through the second half of FY22/23, exceeding the 6-percent mark in January, the central bank’s Monetary Policy Committee (MPC) continued to hike the policy interest rate (repo rate). Since May 2022, the MPC has hiked the repo rate by 250 basis points in six successive meetings from 4 percent to 6.5 percent. However, as price pressures eased on some fronts and global growth slowed, the pace of tightening also slowed, with the RBI only increasing the repo rate by 25 basis points in February, compared with four successive hikes of 40-50 basis points in the first half of 2022. The Standing Deposit Facility (SDF), for overnight deposits of commercial banks with the RBI, has effectively replaced the fixed rate reverse repo rate as the floor of the liquidity adjustment facility and remains 25 basis points below the repo rate. The RBI has continuously highlighted the need to bring inflation back to its threshold range to prevent inflation expectations from getting unanchored. Inflation expectations increased after the pandemic and peaked at over 12 percent in November 2021 but have moderated since then and remain well below their average level in 2010-14.

OUTLOOK

Real GDP growth is expected to moderate in FY23/24 due to global spillovers, monetary policy tightening and slower consumption growth

Real GDP growth is expected to moderate from 6.9 percent in FY22/23 to 6.3 percent in FY23/24, because of continued global growth spillovers, the lagged impact of the monetary policy tightening and slower consumption

growth (Figure 4). Global growth is expected to slow down significantly in 2023 to 1.8 percent (compared to 2.8 percent in 2022), with the pace of growth likely to be the third weakest in nearly three decades and overshadowed only by the global recessions caused by the pandemic in 2020 and the global financial crisis in 2009 (Global Economic Prospects, January 2023). Economic activity has softened amid deteriorating financial conditions on the back of synchronized global monetary policy tightening. While inflation is expected to ease this year following subsiding global supply disruptions, softer demand, and moderating prices of critical commodities like metals and oil, it is likely that inflationary pressures will be persistent for a longer period (Global Economic Prospects, January 2023). In India, while the central bank hiked its policy rate multiple times since May 2022 to keep elevated household inflation expectations anchored, headline inflation remains elevated. The lagged impact of monetary policy tightening, heightened growth uncertainty, and reduced current spending of the government are expected to constrain domestic demand in India in FY23/24. Merchandise export growth will slow down as global demand softens and import growth will also be muted due to moderating domestic demand. The trade deficit is expected to narrow which would lower the drag net exports places on growth compared to FY22/23.

Figure 3: GDP share of government consumption is on a downward trajectory

Figure 4: ...contributing to a moderating GDP growth in FY23/24

Domestic demand will be tempered by higher borrowing costs, lower share of current spending by the government and heightened growth uncertainty

Although private consumption growth was robust in FY22/23, growth momentum is expected to be modest in FY23/24. Weaker global growth prospects and rising borrowing costs are likely to weigh on discretionary spending. Consumer spending by lower-income groups is expected to be hit, weaker than the tepid FY22/23 outcomes, due to slower growth in their incomes. This is consistent with labor market data indicating that over the past two years jobs and earnings losses were higher among informal workers like those in casual-wage work, those with below-tertiary level education, and those in low-paying sectors most affected by the pandemic, such as retail and hospitality services, and construction. While some of these workers and sectors have bounced back to or even surpassed pre-pandemic levels, the weak points of the recovery have shifted as migrants moved back to rural areas and the share of agricultural workers, who are also in vulnerable employment and are among the lowest earners, increased. Domestic demand is also likely to be curtailed by a slower increase in government consumption as the Union Budget reaffirmed the government’s commitment to reducing the share of current spending to 11.6 percent of GDP from 15.6 percent in FY20/21. Overall, government consumption as share of GDP is projected to decline from 10 percent in FY22/23 to 9.3 percent in FY23/24 (Figure 3)

There are some downside risks to India’s growth in FY23/24

Despite the overall resilience of the economy, there are significant headwinds to growth in FY23/24. The recent turmoil in the financial sector in the US and Europe may have adverse spill overs for the global financial markets

through increased volatility and reduced risk appetite for emerging market assets. This could lead to another round of portfolio capital outflows, which in turn could contribute to depreciation pressures on the Indian rupee. External pressures notwithstanding, Indian banks are well capitalized, and the pace of interest rate hikes has been modest compared with advanced economies so the impact of policy tightening on bank balance sheets has been less severe. There are upside risks to food prices due to potentially extreme weather events during the summer and monsoon months. As a result, higher headline inflation could dampen domestic demand. Rural household incomes could also be affected by lower-than-expected agricultural output from the winter harvest due to unseasonal rainfall. Lastly, the expected fiscal consolidation and stabilization of the public debt ratio at around 83 percent are predicated on nominal GDP growth remaining in double digits through the forecast period. Given the high nominal effective rate of interest on public debt (at over 7 percent) a faster than expected moderation in economic growth would cause the public debt-to-GDP ratio to increase further instead of stabilizing at current levels.

Indian Drone Industry Overview

The Indian drone industry has witnessed a rapid growth in recent years, driven by the increasing demand for drones across a range of sectors, including agriculture, infrastructure, public safety, and defence.

The GoI is actively promoting the growth of this industry by introducing policies and initiatives to encourage innovation and entrepreneurship in this field. The Civil Aviation Ministry estimates that the Indian drone market shall reach an estimated turnover of INR 120 to 150 billion by 2026.

In the Union Budget for FY 2022-23, the GoI announced its focus towards promoting the “Kisan Drone” – envisaged as high-tech chemical-free natural alternative to farming to be built on a public-private partnership basis. This Budget also witnessed launch of the “Drone Shakti” mission which will promote drone start-ups as DaaS providers.

The following year’s Union Budget (2023-24) saw the GoI introduce the “Pradhan Mantri Kaushal Vikas Yojana 4.0” to provide industry focused courses like drones, robotics, and mechatronics.

The Indian drone industry has seen the emergence of several start-ups and companies offering a range of drone-based services, including aerial mapping, surveying, inspection, and delivery. Some of the key players in the industry include TechEagle, IdeaForge, Aarav Unmanned Systems, and Quidich Innovation Labs

POTENTIAL OF INDIAN DRONE MARKET

The drone manufacturing industry in India is still in its nascent stages, with a relatively small number of companies currently involved in the production of drones. However, the industry is growing rapidly in recent years, driven by the increasing demand for drone across various sectors such as agriculture, energy & utilities, construction, public safety, and defence.

The Indian drone market potential is expected to grow to USD 23 billion by 2030.

ATMANIRBHAR BHARAT AND THE SIGNIFICANCE OF DRONE MANUFACTURING IN INDIA

Atmanirbhar Bharat, which means self-reliant India, is the vision of the Honorable Prime Minister of India, with a mission of making India “a greater and more significant aspect of the worldwide economy”. It is possible to accomplish this vision by seeking after arrangements that are effective, serious, and strong, and acting naturally, supporting and self-creating. The Honorable Prime Minister envisages quantum jumps in the economy, instead of merely incremental, and such quantum jumps are to be driven by ‘new-age technologies’.

Given the parameters of the Atmanirbhar Bharat Abhiyan, drone manufacturing meets the requirements to a compelling degree. There is a **huge potential of the manufacturing of drone components in the country**. The latent availability of components within multiple elements of Indian Industry makes it feasible for the concerned industry expertise to be re-oriented towards manufacturing of drones.

(Source: <https://aatmanirbharbharat.mygov.in/>)

DEMAND CREATION BY GOI

The government would play a critical role in creation of a viable market for drones, so that the country can realize its own manufacturing potential. The government’s fillip through its role as market maker has a potential to expand demand to approximately INR 75,000 Cr in the Commercial sector, and INR 23,000 Cr in the Homeland Security sector. As much as **60% of the commercial manufacturing potential will arise from Government dominated sectors**.

DEMAND THROUGH MINISTRIES

- *Ministry of Defence.* It is recommended that between 5 to 10% of defense capital budget be allocated for procurement of new drones as well as upgradation of the existing fleet (excluding MRO).
- *Ministry of Home Affairs.* MHA could allocate budget for drones in central schemes like the “Nirbhaya scheme”. Specific allocation for drone procurement under the Police Modernization budget will act as a force multiplier to the law enforcement agencies.
- *Ministry of Urban Development.* The Ministry should recommend drone enabled solutions within the illustrative smart city solutions under the AMRUT mission.

THE THREE PS: PROCUREMENT PROCESSES, PERMISSIONS AND PSUS

Simplifying procurement processes

- A strong case exists to simplify the tendering process of drones by establishing use-case wise standard specs across government departments.
- Considering that drones are an emerging technology and all companies working on the same are startups, procurements process should not have a heavy Pre-Q criterion (most drone companies do not have

significant revenue at this stage) — the process should be QCBS based i.e., Quality cum Cost-Based Selection.

- Adoption would be dramatically accelerated if there were to be procurement commitment of at least 25% or 50% of quantities, in the case of nearest specifications or single-vendor scenarios, respectively.

Permissions

There is a need to provide expedited permissions for a specific project/duration if the area is falling in a Red/Yellow zone.

PSUs

In the past, various ministries have directed their respective PSUs to actively explore / adopt drones in their operations. However, regulatory challenges have stymied implementation efforts. Respective ministries could re-issue such directives to encourage faster adoption of drones while delivering additional benefits.

COLLATERAL-FREE AND PERSONAL-GUARANTEE FREE LOANS

Many **drone startups** are **unable to access bank credit** from traditional channels, mainly due to high credit risk. VC (often foreign) funding remains the only option for such companies.

Financial institutions should provide collateral-free and personal-guarantee free project finance loans at low interest rates to Start-up or MSME companies that have received confirmed government or private sector orders. This will enable them to use the funds toward their working capital needs to fulfill orders. This will also prevent local companies from seeking FDI just to fulfill working capital requirements.

Further, financial institutions may consider giving collateral-free, and personal guarantee free loans up to 100% for companies seeking to invest in testing and manufacturing infrastructure in this sector, as this would also help in reducing the capital-intensive requirements in drone manufacturing.

REGULATORY ENVIRONMENT

In order to liberalize regulations for drones in the country and encourage investments in the Indian drone market, the GoI notified the Drones Rules, 2021 (“Rules”) in supersession of the Unmanned Aircraft System Rules, 2021, as the erstwhile regulations implemented were highly restrictive and were disregarded by the stakeholders.

This space has been left blank intentionally

FLYING ZONES

Green Zone: Green zone is the airspace from the ground up to a vertical distance of 400 ft (120 meters). You can fly your drone in a green zone without the need for permission from the DGCA through Digital Sky.

Yellow Zone: A yellow zone is a controlled airspace. To fly in the yellow zone you would require permission from the air traffic control authority. A yellow zone is applicable for a vertical distance of 200 ft for up to 12 km from the perimeter of an operational airport. The provisions of a yellow zone are also applied above 400 ft.

Red Zone: Red zone is the restricted airspace where drone operations are not permitted unless 'exceptional circumstances' follow. Commercial or leisure drone operations in red zones are generally prohibited.

PRODUCT LINKED INCENTIVE

As part of the Atma Nirbhar Bharat Abhiyan, the GoI notified a PLI scheme with the objective to incentivise manufacturing of drones and drone components in India to make them self-sustaining and globally competitive.

- Tenure of the scheme: 3 years (starting from FY 2021-22).
- Total amount allocated: INR 1.20 billion.
- Cap on incentive by claimant: 20% of the value addition made.
- The PLI scheme covers a **wide variety** of drone components such as Airframe, propulsion systems(engine and electric), power systems, Communications systems, Cameras, sensors, spraying systems etc.
- list of eligible components may be **expanded** by the Government from time to time.
- the eligibility norm for **MSME and startups** in terms of annual sales turnover at a **nominal level** - INR 2 cr (for drones) and INR 50 lakhs (for drone components)
- Eligibility norm for non-MSME companies in terms of annual sales turnover has been kept at INR 4 crore (for drones) and INR 1 crore (for drone components).

The PLI scheme will attract foreign manufacturers to set up facilities in India.

SCHMES INTRODUCED BY GOI

1. SMAM
2. SVAMITVA
3. Drone Shakti

SMAM

Considering the unique advantages of drone technologies in agriculture, the Department of Agriculture & Farmer Welfare has released the standard operating procedures (SOPs) for use of drones in pesticides and nutrient application.

In order to make this technology affordable to the farmers and other stakeholder of this sector, financial assistance of 100% of cost of drones together with the contingent expenditure is extended under sub-mission on Agricultural Mechanisation (SMAM) to the farm machinery training and testing institutes Indian Council of Agricultural Research, Krishi Vigyan Kendra (KVK) and state agricultural universities (SAUs) for its demonstration on the farmer's fields.

In order to provide agricultural services through drone application, financial assistance of 40% of the basic cost of drone and its attachments or Rs 4 lakh, whichever is less, is also provided for drone purchase by existing and new **custom hiring centers (CHCs) under cooperative society of farmers, FPOs and rural entrepreneurs.**

The agriculture graduates establishing CHCs are eligible to receive financial assistance of 50% of the cost of drone up to a maximum Rs. 5 lakh. Funds are released for drone technology promotion based on the proposals received from various eligible entities under the scheme and during the current year, so far an amount of Rs 2.25 crore has been released towards this.

SVAMITVA (Survey of villages and mapping with improvised technology in village areas)

SVAMITVA, a Central Sector Scheme of Ministry of Panchayati Raj was nation-wide launched by the Hon'ble Prime Minister on National Panchayati Raj Day, 24th April 2021 after successful completion of pilot phase of scheme (2020-2021) in 9 states. Scheme is a reformative step towards establishment of clear ownership of property in rural inhabited (Abadi) areas, by mapping of land parcels using drone technology and providing 'Record of Rights' to village household owners with issuance of legal ownership cards (Property cards/Title deeds) to the property owners. The Scheme is implemented with the collaborative efforts of the Ministry of Panchayati Raj, State Revenue Department, State Panchayati Raj Department and Survey of India. The scheme covers multifarious aspects viz. facilitating monetisation of properties and enabling bank loan; reducing property related disputes; comprehensive village level planning, would be the stepping-stone towards achieving Gram Swaraj in true sense and making rural India **Atmanirbhar**.

The Government of India has decided to implement a scheme for surveying the land parcels in rural inhabited area using Drone technology. The survey shall be done across the country in a phase wise manner over the period of five years (2020 - 2025).

DRONE SHAKTI SCHEME

The union government is significantly strengthening the drone industry by liberalising the Drone Rules in 2021 and announcing **Drone Shakti** in the Budget 2022. The government aims to *facilitate and promote drones as a service through startups*. Drone makers and service providers have already been ramping up their product offerings and hiring to meet a spurt in demand that is envisioned to accelerate in line with the government's Production Linked Incentive (PLI) scheme, planned to further bring down drone prices. The **Drone Shakti scheme** and the *INR 120 crore PLI scheme for drone and drone components will help increase domestic manufacturing and create employment*. The fundamental aim of the industry is to *generate a supplier ecosystem for the industry in India*. The Covid-19 pandemic has proven to be a stimulus for India's large-scale adoption of drones by government agencies. The drone technology has been welcomed with liberalised standards, transcending the use of drones formerly limited to government agencies, alone. As the government is propelling and opening the drone industry in India, *more companies and startups will gear up their investments in this sector*. With India's focus on Aatamnirbhar Bharat, the launch of new drone corridors and incentivising local manufacturers, the drone industry will transform the scenario across different sectors in the country.

○ Drone Pilot Training Programs by DGCA-authorized Drone Training Organisation

As per Drone Rules 2021, it is mandatory for a Drone Pilot to obtain Remote Pilot Certificate (RPC) from DGCA-authorized Remote Pilot Training Organisation (RPTO), in order to fly drones legally in India. As a DGCA-authorized RPTO, we offer three types of Certified Training Programs on our own and with our training partners:

S. No.	Course Name	Duration
1.	DGCA-Certified drone pilot training – Small, Rotorcraft Training (“ Course-1 ”)	5 Days

	<i>(Conducted by Drone Destination, IGRUA – Drone Destination and Sanskardham-Drone Destination)</i>	
2.	DGCA-Certified drone pilot training – Small, Rotorcraft and Hybrid Training <i>(“Course-2”)</i> <i>(Conducted by IGRUA – Drone Destination)</i>	7 Days
3.	DGCA-authorized Train the Trainer Course – Small, Rotorcraft <i>(“Course-3”)</i> <i>(Conducted by Drone Destination, IGRUA – Drone Destination)</i>	9 Days

Eligibility Criteria for the above Training Programs:

- Age Limit: 18 – 65 years of age
- Education Qualification: Min. Class Xth from a recognized Board
- Must possess a valid Indian Passport & Aadhar Card

Validity: RPC for a particular Category & Class of Drone is **valid for a period of 10 years.**

Course – 1 DGCA-Certified drone pilot training – Rotorcraft Training

Course Structure:

The 5-Day Training Program is divided into three parts: 02 days of Theory, 01 Day of Drone Simulator & Drone Assembly session, and 02 Days on On-field Flight Training. Upon successful completion of the training, the candidates are issued a Remote Pilot Certificate through DGCA’s Digital Sky Platform*

Course Description:

The Training Program comprises of Theory classes on Drone Rules & Regulations, Principles of Flight, Rotorcraft Drones & Aerodynamics, Fixed Wing Drones & its Aerodynamics, ATC Procedures, Weather & Meteorology, Risk Assessment & Emergency Handling, Payloads & Drone Data Analysis.

The On-field Training consists of a Theory Exam, Drone Simulator Sessions & Sim Assessment, Drone Assembly, Digital Sky Familiarization, multiple Air Exercises in Dual & Solo Mode as per the published DGCA-syllabus, and a final Flight Skill Test.

(Photos are actuals)

* Digital Sky is a ministry of civil aviation initiative which supports technology frameworks for enabling flight permission digitally and managing Unmanned Aircraft operations and traffic efficiently.

Course – 2 DGCA-Certified drone pilot training – Rotorcraft and Hybrid Training

This course its structure and other processes are similar to the DGCA-certified Small and rotorcraft training (**Course 1**), however following are the key differentiator:

- The duration of this is of total of seven (7) days.
- All the sessions conducted in Course 1 are included in this course.
- Hybrid Operations & Aerodynamics
- Dual and solo flying on Rotorcraft *
- Dual & solo flying on Hybrid VTOL**

Rotorcraft is that kind of UAV that has **more than two lift generating rotors. These drones with three or more rotors are ideal for racing, product delivery, filming, photography, and monitoring among other things. The more rotors a multirotor drone has, the more thrust it can generate and thus the greater a payload it can lift.*

(Photos are actuals)

*Hybrid **Vertical Take-Off and Landing (“VTOL”) Plane is a UAV that combines multirotor and fixed-wing configurations. It has a good cruise range compared to Rotorcrafts and can be operated from only a very small footprint.*

Course – 3 DGCA-authorized Drone Instructor Course – Rotorcraft

To rapidly increase the establishment of Drone Training Schools, we have been conducting several “Train the Trainer” courses, that develop Drone Instructors who are authorised by DGCA to further train Drone Pilots in India.

(Photos are actuals)

The Course Structure is similar to that of a DGCA-Certified Small, Rotorcraft Training but with a few more additions listed below, including a DGCA Oral/ Viva Examination by DGCA officials:

- The duration of the course is 09 days.
- Classes on Principles of Learning, Instructional Methods & Learning Resources, Assessing Learner Performances & Remedial Measures, RPTO Training Workflow
- RPTO Documentation Maintenance & Logging
- Training & Procedure Manual Familiarisation
- Drone Instructor Role Play
- Additional Air Exercises such as flying in Triangle, Reverse figure of 8 etc.
- Final Instructor Skill Test

The prospective Instructors qualify for DGCA-Oral Examination only after successfully completing their Drone Instructor Training through approved RPTOs and shall be deemed DGCA-authorized Drone Instructors after successfully passing the DGCA-viva exam.

○ **Application-Based Training Programs**

In addition to Certified Training Programs, we have also started a suite of **Application-based Drone Training Programs** to develop Industry-ready Drone Pilots. All our Application-Based Training Programs are **jointly certified with NSDC** as part of our Training Partner agreement.

b. Surveillance & Monitoring

Our drones are equipped with advanced zoom cameras and IR sensors which are capable of producing high-definition day and night-vision video footage. The company is assisting Excise Department of Government of Bihar to carry out surveillance of illegal liquor manufacturing along the Ganges within the state. We have a specialized team of pilots who can assist users in following monitoring purpose:

Periodic patrolling of assets/ Remote areas/POIs	Patrolling/ inspection of buildings and other facilities such as oil and gas assets through drone have far better results than manual inspection because they are less costly, saves time and does not require intensive labour use which also enables to have periodical patrolling to monitor the condition of buildings, assets etc.
Aerial Surveillance	Aerial Surveillance through drone are far cheaper than traditional methods. Surveillance drones can be equipped with sophisticated imaging technology that provides the ability to obtain detailed photographs of terrain, people, homes, and even small objects. Having high-resolution infrared camera, heat sensors, motion detect sensors would make it possible to remotely carry out surveillance.

Homeland Security	Drone come with several costs and benefits and one of the potential benefit of drones is that they could fill the gap in current border surveillance by improving coverage along remote sections of the borders. Moreover, the range of drone is a significant asset when compared to border agents on patrol or surveillance equipment. To address national and cross-border threats, the Indian army and local law enforcement agencies rely on drone intelligence improving securities.
Encroachment Detection	Drone can also help to monitor illegal constructions and encroachments by conducting surveys, analyse the data gathered by survey to map and make assessment about the extent of illegal construction and encroachments. This can also accurately identify the actual territory which were just before the encroachment. Further data captured through drone is more reliable than any manual inspection conducted to identify encroachment.
Search and Rescue Operations	Search and Rescue (SAR) is a subset of public safety operations and involves activities revolving around finding missing people. Major issue in rescue mission is that such operation is complicated, challenging and unpredictable. No one can predict the result however, drones are becoming a potential life-saving tool in SAR operation, providing critical support to SAR teams to reduce risk to humans, enable quicker aerial support during adverse whether conditions.
Disaster Management	Often in emergency circumstances such as natural disasters, terrorist attacks where roads, bridges, communication cables, gas and water line are compromised, safety of residents in that area is also compromised. To handle and mitigate suffering and further damage, rescue teams can utilize drones to support infrastructures, deliver supplies and establish communication. Areas where it seems impossible to reach, drones can deliver supplies to those in need.
Incident /Accident Response	In the recent years, use of drones in accident emergencies has increased. Among their main benefits are avoiding endangering rescuers, travelling long distances in a short time, or contacting victims in risky situations. Drones cover a significantly larger area than traditional tracking methods and were useful for performing preliminary triage, determining needs, and knowing the scene prior to the arrival rescuers. In addition, drone reduce the time required to locate the victim. Drones are considerable options when attending such emergencies as they significantly improve the distance travelled to locate accident victim, have the possibility of performing triage prior to the arrival of the health care units, and improve the time and quality of care provided.
Traffic Monitoring	Population explosion has dramatically increased the number of vehicles leading Intense traffic congestion specially during peak office hours. Road with heavy traffic movement can be routinely inspected to identify potholes or waterlogged areas which is primary factor for <i>long hour Jams</i> and may lead to accidents. Drones can monitor and provide quarterly reports on congestion as well as road conditions. This data can be used for initiating various plans/appropriate diversions to decongest areas.
Crowd Management	India has become the most populated country in the world, and therefore are more drawn towards crowd management solution in public places. Various public institutions are started using drones for crowd control. Drone equipped with speaker can communicate and give early warnings.

OUR STRENGTHS

1. Largest Drone Training Network in India along with our Training Partner IGRUA, and the highest market share in DGCA-certified Drone Pilot Training.

As per the Drone (Amendment Rules), 2022, notified on 11th Feb 2022, a Remote Pilot Certificate by a DGCA-authorized Remote Pilot Training Organisation (RPTO), is required for all pilots to legally fly drones in the country.

Drone Destination conducts Certified Drone Pilot Training through its own Training Bases as well as with its Training Partners, Indira Gandhi Rashtriya Uran Akademi (IGRUA) and Sanskardham.

As on May 12, 2023, there are 53 RPTO bases in the country, out of which **11 bases belong to Drone Destination and its Training Partners (IGRUA, Sanskardham)**. These locations are situated at Manesar (Haryana), Bangalore (Karnataka), Dharamshala (Himachal Pradesh), Mohali (Punjab), Gwalior (Madhya Pradesh), Phulpur (Uttar Pradesh), Ahmedabad (Gujarat), Coimbatore (Tamil Nadu), Madurai (Tamil Nadu) and Bhopal (Madhya Pradesh). COLLABORATIONS

We have entered into MoU(s) and agreements with various entities, the details of which are given on page 124, under the head “Our Strengths” sub-head “*Key Partnerships in the Training & Drone Service Space*”.

COMPANY’S STRATEGY

1. **Build the largest network of Drone Hubs pan-India, offering multitude of drones, services, training and after-sales services.**

In our vision to become a customer-centric, DaaS company, and offer fastest turn-around service timelines at most affordable costs, we wish to develop close proximity with the end-users and thus develop a large network of Drone Hubs. These hubs would consist of drones on rent as per local demand, have commensurate skilled manpower of pilots and technicians for operations and after-sales service, and offer customized training programs. The multi-base operations shall be controlled via a Master App consisting of features like Drone Fleet & Field Force management, Demand aggregation and scheduling, Service/ Job-work allocation, and Performance Reporting modules etc. We shall continue to develop a pipeline of skilled workforce to execute our plans while building solid incentive programs to encourage employee retention.

2. **Grow the existing Service Portfolio and introduce new, high-value Drone Services:**

We shall continue to target an incremental share of pie for various drone survey projects. Further, the Company plans to target more sophisticated Drone-powered Services using drones equipped with advanced LIDAR, Multi-spectral and Hyper-spectral sensors.

3. **Create major awareness campaigns amongst youth and conduct demos and trials amongst users to educate them about the benefits of the new drone technology and explore employment and entrepreneurship opportunities within the growing UAV space.**

Since the drone industry is at a very nascent stage, we intend to increase its awareness to the maximum extent to the youth, by organizing campaigns, conducting demos and trials for various stakeholders, elucidating the diverse benefits and usage of drones, and addressing concerns around safety and security, so adopters of this new technology can make informed decisions about effective utilization of the drone technology. Increased adoption will push high-growth in the industry and subsequently create many large-scale employment and entrepreneurship opportunities.

4. **Future Business Verticals**

a. Rent a Drone

In a fast-evolving technology, where redundancy will be a norm, the ownership of drones can be riskier and expensive, therefore we recognise that there will be an ever-growing demand for drones on rent and have decided to offer “Rent a Drone” services along with certified drone pilots, similar to the wet-lease model within the manned Aviation space.

Our company aims to develop the largest Network of Drone Hubs (150+ locations over the next 05 years) and deliver drone-powered services on rent along with its certified drone force, ensuring fastest turn-around time, high operational efficiency at affordable costs. To optimize and efficiently utilize its assets, the company is developing an integrated app consisting of features such as Drone Fleet & field force management, Demand aggregation and scheduling, Job/ service mapping, and Service Delivery Reporting modules etc.

b. Agricultural Services

The potential uses of drones in the agricultural industry are vast and largely untapped. We are committed to deploy a large fleet of agriculture drones to provide specialized agriculture drone services including drone spray, crop health assessment, soil analysis, yield management and crop insurance survey. We plan to offer such precision-agriculture solutions pan-India via an extensive network of Drone Hubs and Stores. These hubs will be both Company-Owned, Company-Operated (CoCo) as well as stores belonging to our Partner Fertilizer & Agro-chemical companies, Farmer Producer Organisations (FPOs) etc.

Our company is gearing up to offer a multitude of Precision Agriculture services such as:

(Photos are actuals)

1. Agricultural Spray using Drones

Our team of DGCA-certified Drone Pilots shall offer professional, drone spray services conducted as per the SOPs released by the Ministry of Agriculture & Farmer Welfare. Our company is curating customized spray solutions and working closely with Agrochemical, Pesticide & Fertilizer companies. We are jointly developing bespoke formulations as well as Crop-specific SOPs to create the most efficient solution for your farms.

Company's services will enable:

Efficiency	Can spray 20-25 acres per day per drone.
Safety	Protect farmers form harmful pesticide poisoning and heatstroke.
Pesticide & Agro-chemical savings	High degree of atomisation, chemical fog can save 30% of pesticide.
Water Table Optimization	Can adopt ultra-low volume spray technology, water consumption is only 10%.
Low cost	The cost is only 1/3 of traditional spraying method.
Applications	Wide range of applications, crops, flowers, trees, fruits.
Environment	Reducing pollution to water & soil.

2. Data-Driven Precision Farming

Our company is developing an expert team of Agronomists, Agri-scientists and precision-agri drone pilots to drive its Digital Agriculture initiatives. The data captured using drones equipped with multispectral/hyperspectral sensors and subsequent analytics by the team of Agriculture experts shall assist farmers in providing data-driven insights on ways to mitigate crop damage, improve crop health, increase yield per acre and double farmer income.

Our company plans to offer several drone-powered precision agriculture solutions such as:

Soil and field analysis	Precise maps for early soil analysis, which can be useful in planning seed planting patterns. After planting, our drone-driven soil analysis shall provide data for irrigation and nitrogen-level management.
Crop Monitoring	Vast fields and low efficiency in crop monitoring together create farming's largest obstacle. With the help of our drone, you will be able to create timeseries animations to show the precise development of a crop and reveal production inefficiencies, enabling better crop management.
Irrigation	Our advanced UAV systems equipped with hyperspectral, multispectral, or thermal sensors (with the ability to switch payloads) will identify which parts of a field are dry or need improvements and calculate the vegetation index.
Health assessment	We will help in assessing crop health and spot bacterial or fungal infections with the help of multispectral images captured by our drone. Farmers can subsequently devise remedy plans and monitor its outcome with frequent UAV flights.
Livestock Farming	Livestock Farmers can use drones to obtain an aerial overview of the area in which they keep their livestock. Our thermal imaging and high-definition cameras allow farmers to track and monitor their livestock remotely, identifying any issues in real time, thus enabling them to resolve issues quickly and efficiently.

3. Crop Insurance Survey

Our company plans to offer Crop Survey services to Insurance & Insurance brokerage firms and assist such firms to validate and verify crop damage/ wastage claims made by the farmers. Our drones, capable of capturing highly accurate, precise, geo-tagged data, shall offer fast, efficient and transparent means for Insurance companies to verify claims and fast-track the claim settlement process for farmers and land owners.

The drone-powered crop-insurance support includes:

Accelerated Imaging Process and Analysis	With our intelligent drone platforms integrated with multispectral sensors, insurers can use our data acquisition services to gather data and check the legitimacy of claims made by the farmers/ and growers can now capture highly detailed imaging on time. The insurers can also confirm any claims through drone imaging, which can present necessary data for assessments.
Supports Cost-effective Procedures	Using crop insurance drone for crop inspection and insurance also saves costs. Traditionally surveying the field requiring extensive labour and time; Drone Destination can assist crop insurers with our data capturing and processing services, comprehend the crop situation, and distinguish the damaged or infected area.
Enhanced Assessment for Crop Loss Claim	We can help with efficient claim adjudication needed in formulating estimation and resolution for crop damage. Our drones can produce well-detailed footage, while its multifunctional sensors help prove claims better and faster.

c. Asset Inspection

Presently, majority Industrial Inspections have involved the use of ladders, hydraulics, cranes, and large-scale machinery to oversee industrial infrastructure and locate bottlenecks. It also poses risk to the human inspectors

along with financial implications due to machinery shutdown. However, in recent times drones’ usage are widely considered as inspection tool for collecting visual data which may not be possible in certain circumstances by asset inspection through conventional ways.

The company intends to offer several Asset inspection solutions such as:

- UAVs that can perform both day and night inspection, as well as cover larger areas in more efficient ways and at lower costs.
- Faster problem recognition capabilities to carry diverse tasks such as corrosion identification, detection and analysis of cracks, dilapidation assessments, spillage, and leak detection etc.
- Drones equipped with transmitters that share real-time feed, allowing inspectors/ assessors to see exactly what is going on at a particular instance.
- Non-disruptive technology that doesn’t require ceasing operations.
- Our drone inspections services provide you with a more efficient, cost-effective, and safe inspection process that gives better, closer monitoring and control, while you continue your business operations as usual. Our inspection services cater to large-scale industries such as Power, Telecom, Oil & Gas, Wind Turbine, Solar and Infrastructure.

COMPETITION

In today's dynamic business environment which is filled with rapid change of technology, government policies, mounting competitive threats and constant new entrants into the market, makes it challenging to sustain and handle the intricacies and provide competitive solutions to its clients. We face competition from domestic and international companies. We foresee this competition to continue to grow as the demand for software development solutions increases. Apart from that, clients may reduce their dependence on vendors in India and outsource work to other offshore destination.

Further we believe that our competition also depends on several factors which include currency fluctuations, changing business framework, information technology policies, difficult to retain skilled staff.

Our Listed Competitors are:

1. Droneacharya Aerial Innovations Limited
2. Ideaforge Technology Limited (In the process of listing)

Drone Base Station: The Drone base stations are the central communication point for wireless devices to communicate. Base stations receive signals from GPS satellites and create a correction factor that eliminates errors in the GPS and then sends it to the rover. Rovers calculate grade, find exact locations and elevations, measure ground, saw cut, surface tie-in points, and as-built points. In laymen terms, a base station helps in achieving high accuracy data needed for drone survey as per Survey of India requirements.

On registration, the proprietor of the design attains a copyright over the same. The duration of the registration of a design in India is initially ten years from the date of registration.

Other laws applicable to our Company and its business

The Negotiable Instruments Act, 1881

In India, the laws governing monetary instruments such as cheques are contained in the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. To ensure prompt remedy against Defaulters and to ensure credibility of the holders of the negotiable instrument a criminal remedy of penalty was inserted in Negotiable Instruments Act, 1881 in form of the Banking, Public Financial Institutions and Negotiable Instruments Laws (Amendment), 1988 which were further modified by the Negotiable Instruments (Amendment and Miscellaneous Provisions) Act, 2002. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honoured by their bankers and returned unpaid. Section 138 of the Act, creates statutory offence in the matter of dishonor of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two year, and with fine which may extend to twice the amount of the cheque, or with both.

The definition of "consumer" has been expanded under the Consumer Protection Act to include persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. One of the substantial changes introduced by Consumer Protection Act is inclusion of the ecommerce industry under Consumer Protection Act with "e-commerce" defined to refer to the buying and selling of goods or services over digital or electronic network. Therefore, the Consumer Protection Act aims to cover entities that are involved in the process of selling goods or services online. Further, the Consumer Protection Act enables complainants to file complaints in respect of, inter alia, goods suffering defects, services suffering deficiencies, and goods or services hazardous to life and safety. Phased implementation of unified payments interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six (6) Working Days.
- b. Phase II: This phase commenced on completion of Phase I i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase,

submission of the Application Form by a Retail Individual Bidder through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

- c. Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed Yes Bank Limited as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws.
